Customer Problem Statement Template:

Our customer is **an online shopper** who wants to **browse products, view store details, and purchase items easily from one platform** because they expect shopping to be fast, clear, and trustworthy.

Currently, they may struggle with **finding the right store or product, understanding product information, and completing actions without confusion**, which can lead to **frustration, low trust, and abandoned purchases**.

A successful solution would help customers **discover stores and products quickly, make confident buying decisions, and enjoy a smooth shopping experience** by providing **clear store listings, organized product information, reliable backend data, and simple navigation**.

A shorter version:

Online shoppers need a simple and reliable way to discover stores, browse products, and make purchases because confusing or incomplete shopping experiences reduce trust and cause customers to leave before buying.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	I am an online shopper	I'm trying to find stores/products and buy what I need quickly	But it can be difficult to know where to look or whether the product/store is reliable	Because product and store information may not be clearly organized or complete	Confused, uncertain, and less likely to complete the purchase
PS-2	I am a store owner/seller	I'm trying to list and manage my store/products online	But reaching customers and keeping store information updated can be hard	Because I need a simple platform to manage store details, products, and customer visibility	Frustrated, limited, and worried about losing sales
