

Project Design Phase
Proposed Solution Template

Date	15 February 2025
Team ID	
Project Name	ShopEZ: E-Commerce Application
Maximum Marks	2 Marks

Proposed Solution Template:

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Customers struggle to find reliable stores and products because information is often scattered, incomplete, or difficult to navigate. At the same time, sellers need an accessible way to showcase products, manage store information, and reach customers online.
2.	Idea / Solution description	Develop a centralized e-commerce platform where customers can discover stores, browse products, compare options, and purchase items through a simple interface. Sellers can create and manage their stores, product listings, prices, and availability digitally.
3.	Novelty / Uniqueness	The platform brings multiple stores together while maintaining individual store identities. It provides centralized product discovery, organized store information, and a convenient experience for both customers and sellers.
4.	Social Impact / Customer Satisfaction	The solution supports small and local businesses by increasing their digital visibility and market reach. Customers benefit from improved accessibility, greater choice, reduced shopping time, and a more transparent and reliable experience.
5.	Business Model (Revenue Model)	Revenue can be generated through commissions on sales, seller subscription plans, promoted product listings, advertisements, delivery charges, and optional premium services for store owners.
6.	Scalability of the Solution	The platform can expand by supporting more users, stores, products, categories, locations, and payment methods. Future versions may add mobile applications, recommendations, reviews, analytics, multilingual support, and delivery-service integrations.
